
Green Tips

Buying green is easier than ever.

Now it's a little easier to buy green.

- Check out the EPA's compiled database of products:
<http://yosemite1.epa.gov/oppt/epstand2.nsf/Pages/Search.html?Open>
- Did you know that the United States consumes approximately 25% of the world's resources with only 5% of the world's population?
- You can do your part to reduce that number by buying more environmentally preferable products.
- What is "environmentally preferable?"
"...products or services that have a lesser or reduced effect on human health and the environment when compared with competing products or services that serve the same purpose..." - Executive Order 13101
- The EPA has created a database for Environmentally Preferable Purchasing. Though the Environmentally Preferable Purchasing (EPP) program was created as a federal-wide program that encourages and assists Executive agencies in the purchasing of environmentally preferable products and services, anyone can search their database for a list of green products.

Happy shopping!
